General Comment

Get rid of ALL PESTICIDES, you are killing us and our future, meaning our children! How dare you screw around with our lives! Are you eating foods that contain harmful ingredients? If not, why should we? I can't believe I live in a screwed up country. Other countries banded harmful pesticides, herbicide, artificial coloring, and any other ingredients that will cause harm to our bodies. Why haven't you followed them. Are you that stupid! Have you read MOMS ACROSS AMERICA. Wow, the statistics are disgusting. They say, of the top 17 most developed countries, the USA is last in health. It's #1 for infant deaths on the first day of life, 1 out of 2 children have chronic illnesses today, 1 out of 2 males and 1 out of 3 females are expected to get cancer today and Pesticides are linked to loss of IQ. American IQ has dropped 7 points since GMOs. My thought is "are you trying to control the population of our country?" You could all afford buying 100% organic foods, but most of our country's population can't, do to our income. Why do other countries help their people and this country does not.
